4.b Hydrologic Balance: Sediment Ponds and Impoundments

The East and West ponds both contained a small volume of water. Mr. Edwards performed the 3rd Quarter impoundment inspections for both ponds on September 1, 2010. There were no signs of instability or erosive action at the ditch inlets or on the in-slopes. The open channel spillways were clear and were capable of functioning as designed. Available sediment storage capacity is in excess of 90%.

4.d Hydrologic Balance: Water Monitoring

The County received rain during the evening hours of 10/3/2010. This was not evident during today's inspection.

4.e Hydrologic Balance: Effluent Limitations

Neither the East pond nor the West has ever been close to discharge elevation.

20. Air Quality Permit

The area between the Ridge Road and the Permit Area main gate has been asphalted to reduce fugitive dust emissions.

21. Bonding and Insurance

The Permittee renewed the general liability insurance coverage for the Wellington facility effective October 1, 2010 through October 1, 2011. The insurers affording coverage are the Illinois Union Fire Insurance Company and the Liberty Mutual Fire Insurance Company. Coverage amounts for each occurrence and general aggregate are two million dollars and four million dollars respectively. The amount of reclamation bond held by the Division for this site remains unchanged.
